

SKHANYISO NKOSI

073 698 5541 | Skhanyisonkosi10@gmail.com | Bloemfontein / Durban, South Africa

PROFESSIONAL SUMMARY

Detail-oriented IT graduate (NQF 6) specializing in full-stack software development, mobile application development, and systems administration. Demonstrated ability to design, build, and deploy cross-platform applications using ASP.NET Core MVC, Flutter, Firebase, and SQL. Proven track record delivering real-world government-level solutions during Work Integrated Learning. Committed to writing clean, scalable, and secure code with a 74% academic average. Seeking an entry-level software developer or IT specialist role to contribute technical expertise to a forward-thinking organization.

TECHNICAL SKILLS

Programming Languages: C#, Dart, Java, SQL, HTML5, CSS3, JavaScript

Frameworks & Technologies: ASP.NET Core MVC, Flutter (MVVM Architecture), Firebase Authentication, Cloud Firestore, REST APIs

Databases: Microsoft SQL Server, Firebase Firestore, fundamental database design and IS logic

Development Tools: Visual Studio, Visual Studio Code, Android Studio, Git, GitHub

Core Concepts: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Systems Analysis, Debugging and Testing, UI/UX Fundamentals, Information Security, Risk Management

IT Support: 1st Line Support, Hardware Diagnostics, Cisco IT Essentials

EDUCATION

Diploma in Information Technology

2022 – 2025

Central University of Technology (CUT), FS, South Africa

Advanced Diploma in Information Technology

2026 – 2027

Central University of Technology (CUT), FS, South Africa

WORK INTEGRATED LEARNING

Full-Stack Systems Developer

2024 – 2025

- Engineered a cross-platform Skills Audit System for the National Treasury to automate compliance reporting and digitize personnel audits at a national level
- Developed a Flutter mobile front-end and an ASP.NET MVC web dashboard as integrated components of a unified system
- Implemented Google Firebase for secure user authentication and real-time data synchronization across platforms
- Applied strict security protocols and data handling standards appropriate for sensitive government information
- Delivered streamlined data collection and reporting workflows, reducing manual audit processing effort

PROJECT EXPERIENCE

Student Management & E-Commerce Web Application

Technologies: ASP.NET Core MVC, Microsoft SQL Server

- Developed a full-stack web application combining student management functionality with B2C e-commerce capability
- Implemented role-based access control for administrators and standard users
- Built full CRUD operations for managing students, products, and orders
- Designed responsive and dynamic UI using MVC architecture patterns

Consultation Booking Mobile Application

Technologies: Flutter, Firebase, Firestore

- Built a mobile application for booking consultations with real-time Firebase database integration and secure authentication
- Implemented separate student and admin portals with login and registration functionality
- Designed an admin dashboard with full CRUD management capabilities
- Applied MVVM architecture for maintainable and scalable code separation

Centralized Lost and Found Mobile Application

Academic Research Project

Technologies: Flutter, Mobile Architecture Design

- Formulated the research problem statement and designed the mobile architecture for a campus utility application
- Designed the system to streamline reporting, tracking, and recovery of lost items within a university ecosystem

Dog Walker & Pet Services Mobile Application

Technologies: Flutter

- Developed an application connecting pet owners with dog walkers and adopters
- Implemented distinct user roles with differentiated access permissions
- Designed an intuitive UI for booking and managing pet services

Information Security Case Study – Data Breach Analysis

Academic Research Project

- Conducted technical analysis of a real-world corporate data breach incident
- Evaluated organizational control failures, procedural weaknesses, and data handling vulnerabilities
- Presented risk management strategies aligned with corporate IT governance and security best practices

CORE COMPETENCIES

Problem Solving | Analytical Thinking | Attention to Detail | Team Collaboration | Communication | Time Management | Adaptability | Quick Learning

ADDITIONAL INFORMATION

- South African Citizen, available for employment and willing to relocate
- Available for internship or entry-level software development / IT specialist roles
- Open to hybrid and remote work arrangements
